DESCRIPTION

I'm a freash graduate from Vocational High School (SMK), majoring in Software Engineering. During my studies, I gained practical experience in web developing by building various web application using react and and laravel framework. After graduation, I leveled up my skills by joining an IT program at UT School. My background gives me a solid foundation in software engineering, and I'm always proactive in improving myself, making me a motivated individual ready to contribute to the tech industry.

EDUCATION

UT School

May 2024 – July 2024

Fullstack Developer

- Learned the basic components of website development, including HTML, CSS, and JavaScript
- Created APIs using the MVC concept using Asp Net Core
- Developed MVC APIs. React.js: Integrated APIs into the client-side using Node.js
- Studied basic PHP and the Laravel framework for full-stack web development
- Developed a travel website for Umrah & Hajj, with the customer website using Laravel, admin website using React.js, and a mobile app using React Native. All three websites were built with APIs from .NET and Node.js.

SMK Brantas Karangates

July 2021 – May 2024

Software Engineering

- Developed a cashier system website for a store using HTML, Bootstrap, JavaScript, and the CodeIgniter 4 PHP framework for UKK project
- Created a Laundry Coin Management system website using HTML, Bootstrap, JavaScript, and the CodeIgniter 4 PHP framework for LSP Certification

WORK EXPERIENCE

PT. United Tractors Tbk (DAD)

August 2024 – November 2024

Web Developer Internship

- Created an individual project (assessment) for the UT School presentation
- Designed the database, ERD, use case diagram, and flowchart for the application
- Built the backend structure of the application using ASP.NET Core WebAPI with the CQRS pattern
- Developed the client-side interface using React with TypeScript and styled it with Tailwind CSS
- Tested the application for production environment and Dockerized it and Deployed the application using a VPS from Biznet Gio
